

New 2001 Waves of Hope

Shirley McNeely

Shirley had a biopsy and a lumpectomy was performed, followed by a mastectomy. At that time no further treatment was required. However, in 1997, a small lump on the same side proved to be malignant. This was the lump that got away. Since that time Shirley has been on tamoxifen and has had the regular routine of follow-up trips to Winnipeg.

Shirley was married in 1955 to Trevor and is the mother of four, grandmother of six. 1994 found Shirley selling and retiring from her own accounting business. Since then, she has done a considerable amount of travelling mostly to warmer climates during the Manitoba winter season. After the dragon boat festival in Regina, she decided to take a tour of China.
